## ► Overview

As an update of **ISO 21500:2012**, **ISO 21502:2020** provides guidance to help project managers and project-based organizations deliver projects successfully. The standard also provides high-level descriptions of effective project management practices.

The guidance provided by ISO 21502 can be applied to any organization and all projects. Moreover, in addition to project managers and executive management, the standard can be used by project sponsors and boards, auditors, and organizations that develop national or organizational standards or practices for project management.

## ► Objectives:

**By the end of this training course, participants will be able to:**

- Explain the fundamental concepts, approaches, and methodologies regarding project management.
- Implement integrated project management practices based on ISO 21502 when undertaking a project.
- Implement individual project management practices based on ISO 21502 when undertaking project activities.

## ► Outlines:

- Introduction to ISO 21502 and project management.
- Integrated project management practices.
- Management practices for a project.
- Management practices for a project (cont.).
- Certification exam.

## ► **Outcomes and Professional Benefits**

**By using ISO 21502 guidelines on project management, organizations and project managers will be able to:**

- Transform their ideas into tangible or intangible deliverables.
- Manage and engage stakeholders successfully when developing and implementing projects.
- Initiate, plan, implement, control, and close projects with specific objectives, scope, and resources.
- Control changes to projects.
- Manage organizational and societal changes that impact projects.
- Conduct risk assessments regarding the project & manage identified risks.
- Learn from project management activities.
